

3B
A2

1 6. (Amended) The lithium secondary battery of claim
2 4, comprising a lithium ion conductive solid polymer electrolyte
3 formed by the polymerization of a mixture consisting of an organic
4 compound having at least one carbon—carbon double bond and a
5 lithium silylamide compound, wherein the mixture is a prepolymer
6 and is interposed between a positive electrode and a negative
7 electrode for joining the electrodes together.

1 7. (Amended) The lithium secondary battery of claim
2 4, comprising an electrode comprising a solid polymer electrolyte
3 polymerized by the application of and drying of a mix comprising a
4 mixture consisting of an organic compound having at least one
5 carbon—carbon double bond and a lithium silylamide compound.

Please add new claims 8-11 as follows:

A3

1 8. (Newly Added) The lithium secondary battery of
2 claim 5, comprising a lithium ion conductive solid polymer
3 electrolyte formed by the polymerization of a mixture consisting of
4 an organic compound having at least one carbon—carbon double
5 bond and a lithium silylamide compound, wherein the mixture is a
6 prepolymer and is interposed between a positive electrode and a
7 negative electrode for joining the electrodes together.

1 9. (Newly Added) The lithium secondary battery of
2 claim 5, comprising an electrode comprising a solid polymer
3 electrolyte polymerized by the application of and drying of a mix
4 comprising a mixture consisting of an organic compound having at
5 least one carbon—carbon double bond and a lithium silylamide
6 compound.

1 10. (Newly Added) The lithium secondary battery of
2 claim 6, comprising an electrode comprising a solid polymer
3 electrolyte polymerized by the application of and drying of a mix
4 comprising a mixture consisting of an organic compound having at

5 least one carbon—carbon double bond and a lithium silylamide
6 compound.

A3
cont.
1 11. (Newly Added) The lithium secondary battery of
2 claim 8, comprising an electrode comprising a solid polymer
3 electrolyte polymerized by the application of and drying of a mix
4 comprising a mixture consisting of an organic compound having at
5 least one carbon—carbon double bond and a lithium silylamide
6 compound.

Respectfully Submitted,

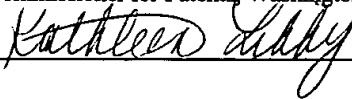

Lawrence E. Ashery, Reg. No. 34,515
Attorney for Applicants
